WHO ARE WE?

The National HPV Vaccination Roundtable is a coalition of over 70 organizations working at the intersection of immunization and cancer prevention. We were founded by the CDC and the American Cancer Society, but our power comes from the collective body of passionate cancer prevention and immunization advocates who volunteer their time and talents to advance our mission.

OUR MISSION

We are on a mission to raise HPV vaccination rates and prevent HPV cancers in the United States.

OUR VISION

We see a future where HPV immunization rates are raised to 80%, and looking beyond, we will advance towards eliminating vaccine-preventable HPV cancers as a public health problem.

Funding for this plan was made possible in part by the Centers for Disease Control and Prevention Cooperative Agreement grant number NH23/IP922551-03, CFDA # 93.733. The content does not necessarily reflect the office policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

WHAT WE DO

We have three primary areas of activity—we convene, communicate and catalyze.

CONVENE: We convene national organizations, experts, and key stakeholders to ideate, strategize, and problem solve.

COMMUNICATE: We communicate and inform providers, systems, coalitions, parents, and the public about the importance of HPV vaccination as cancer prevention.

CATALYZE: We catalyze our members, and by extension the public, to take action to close the adolescent vaccination gap.

MEMBERSHIP

Our membership consists of over 70 organizations that prioritize HPV-associated cancer prevention through immunization and/or cancer control. In addition, individual subject matter experts may be invited to participate, and organizations may be recruited as ad hoc members to achieve short term priorities.

Health systems and public health organizations are invited to support our mission through membership in our We’re In! 2020 initiative. This is the best way for local and state organizations to stay informed and be activated in affiliation with our work.
As we publish this, the world is facing a pandemic for which there is no vaccine. Vaccinations save lives, and we are more committed than ever to preventing the human papilloma virus. Only 51% of U.S. teens are fully vaccinated against HPV. The HPV vaccine is a cancer prevention vaccine which is highly effective and proven to help protect against six cancers in men and women.

13,500 men and women diagnosed with HPV oropharyngeal cancers

There is no screening test for HPV oropharyngeal cancers.

355,000 men and women are treated for genital warts

34,800 HPV cancers are diagnosed each year in the U.S.

330,000 women are diagnosed with high grade cervical dysplasia (also known as "pre-cancer")

2 million women face abnormal cervical cancer screening test results
MEMBER RESPONSIBILITIES

National member organizations are expected to be active catalysts for HPV cancer prevention.

Organizations agree to:

- **Commit** to advancing the mission of the HPV Roundtable
- **Report** annually on their HPV activities
- **Contribute** their organizational expertise for the greater good through participation on task groups, committees or collaborative projects
- **Disseminate** our materials and information to their constituencies
- **Promote** our brand and social media through their communication channels
- **Assign** an official representative and participate in interviews/surveys as requested
- **Attend** the national meeting

REPRESENTATIVES HAVE THE OPPORTUNITY TO INFLUENCE AND LEAD PUBLIC HEALTH EFFORTS TO ELIMINATE HPV CANCERS THROUGH THIS WORK.

2019 ACTIVITIES

- Broadcast livestream of our bi-annual Best Practices Conference
- Built out our Resource Library
- Convened our membership at the fourth national meeting, August 2019
- Developed a suite of best practice evidence summaries
- Gathered leaders from integrated delivery systems at St. Jude Children’s Research Hospital to develop a health systems action plan, Jan. 2019
- Grew Twitter following by 43% to over 1,700 followers
- Hosted HPV coalition leaders from 7 southeastern states at a regional networking and capacity building summit, resulting in follow-up activities in each state to convene, communicate and catalyze state-level actors, March 2019
- Launched a YouTube channel
- Presented at various conferences, webinars and meetings
- Launched an HPV Learning Collaborative in partnership with AMGA, CDC and the Office of Infectious Disease and HIV Policy
**2020 Priorities**

**MEMBER ENGAGEMENT**
- Grow content for YouTube, Facebook, LinkedIn and blog
- Advance strategy on HPV cancer elimination as a public health problem
- Deploy the new HPV Prevention: Nurses Get it Done! Toolkit
- Conduct annual member survey and assess members’ HPV activities
- Expand opportunities for member presentations, publications and participation

**INTEGRATED DELIVERY SYSTEMS**
- Lead national We’re In! 2020 initiative to catalyze health systems
- Implement HPV Learning Collaborative with AMGA
- Disseminate Health System resources

**STATE COALITIONS**
- Align state efforts to We’re In! 2020
- Host regional leadership summit for Northern Plains/Northwestern states
- Provide ongoing support to Southeastern states

**2020 Communication Activities**
