## State Coalitions & Roundtables Guide

### Guidance for Coalition Work

The HPV Roundtable supports state and local HPV vaccination efforts by gathering stakeholders, sharing guidance and promising practices, and developing new resources for this work.

After meeting with HPV coalition leaders from nine different states, members of the State Coalitions & Roundtable Task Group worked together to develop the topics in this "living" Guide. We are a work in progress, so keep checking back over 2018 to see what's new.

#### What resources are there to support your work as a HPV Vaccination Coalition?

We have great examples of coalition work from the cancer control community. We hope to bring you more new resources throughout 2018.

LISTEN IN TO THE REBEL TRANSMISSION

# Are we abiding to our charge?

*We have been able to increase the focus of state/territorial/local immunization programs on HPV. The resources and connections from the Roundtable have been instrumental in spurring activity on the state level. Agree that there is more to be done.*

The roundtable did an excellent job in achieving its 2016 vision. As a new member, the vision was very clear and all participating members were encouraged to provide their thoughts and input. Excellent start, great guide product, and looking forward to seeing more in the guidance on evaluation of efforts.

*I was pleasantly surprised at how well and fast the guide idea developed and was executed. I thought that was well done and nice to see included on the new website.*
