Activities

- Public Education
- Patient Education
- Patient Advocacy
- Screening Delivery
- Professional Education/Outreach
- Practice Improvement
- Improving EHRs
- Promoting Quality Improvement
- Health Insurance
- Working with Insurers

Proudest Accomplishments

- HPV toolkit
- 2015 NIS TEEN DATA showed increase in HPV vaccination rates for boys and girls in KS, not last in the nation anymore
- Held leg. educational opp for KS Legislature (non lobbying) in Feb. that expressed to law makers importance of adolescent vaccine safety and cancer prevention with HPV vaccination
- Key immunization legislation passed in 2017 in KS that allowed pharmacists to vaccinate kids down to age 12 and mandated providers report to the statewide immunization registry by 2020. IKC is non lobbying organization, yet coalition members provided objective feedback on both issues.
