

Interested in taking a deeper dive in the Blue Cross Blue Shield adolescent vaccination report data?

The American Cancer Society has developed a Tableau dashboard to visualize the data by state and MSA, making it easier to interpret.

1. Check it out at <http://bit.ly/bcbshpvdashboard>

2. Click on a state in the US map to filter the rest of the dashboard

3. Dive in! You could...

- Compare MSAs in your state to identify high performers
- Compare states in your region
- Consider how BCBS rates relate to NIS-teen or IIS rates
- Take screenshots and share with partners
- You tell us! We'd love to know how you use this resource. Contact Sandy Preiss, ACS HPV Data Manager: [sandy.preiss@cancer.org](mailto:sandy.preiss@cancer.org)
