

HPV Vaccine: It's Cancer Prevention

Who? All kids (both boys and girls) should get the vaccine starting at age 9.

What? The human papillomavirus (HPV) vaccine is a cancer prevention vaccine.

Why?

- The HPV vaccine prevents 6 different cancers (mouth/throat, cervix, vulva, vagina, penis and anus).
- The HPV vaccine prevents most genital warts.
- The HPV vaccine is safe and effective, with no long term side effects.
- The HPV vaccine has been given for more than 15 years and provides long lasting protection.

When?

Late
AGES 13-14
2 Doses
6-12 months apart

Critical
AGES 15-26
3 Doses
1st dose at visit one
2nd dose 1-2 months later
3rd dose 6 months after 1st dose
